MSc Coastal & Marine Environments

Physical Processes, Policy & Practice

Coastal and marine environments are critical to local and national economies, support diverse habitats and communities, and provide a suite of ecosystem goods and services. This field-intensive postgraduate programme focuses on emerging discourses surrounding their long-term health, use, planning, and management.

This **MSc programme** is directed at graduates from Geography, related Natural, Environmental, and Social Sciences, and professionals in the field interested in advancing their knowledge and skills.

Through **lectures, workshops, field exercises, and independent research**, this programme will challenge you to engage scientifically in these environments, critically analyse how coastal and marine systems function, are managed and conserved, and assess plans and policies meant to ensure their long-term sustainability, in Ireland and beyond.

Programme Details

Course Level: Master's of Science

Duration: 12 Months, Sept – August

Entry Requirements:

Undergraduate Degree Second Class Honours Grade 1, or Bachelor's Equivalent GPA 3.0

Tuition & Fees:

FAFSA-Registered
See www.nuigalway.ie/fees

Admissions:

Rolling Admissions;
20 places per year
