# Course Overview

- The BSc in Social Sciences and Sustainability is a four-year applied social science degree providing students with the knowledge, understanding and skills needed to tackle the most pressing social, ecological, political and economic challenges of our times.
- This interdisciplinary course exposes graduates to multiple perspectives, building their capacities to respond to complex societal issues with innovative solutions that cannot be provided by one discipline alone.
- The programme focuses on the applied nature of the social sciences in order to equip students with practical research skills while also supporting career development and readiness to pursue employment and further educational opportunities in diverse fields where social science competencies are vital.
- The BSc in Social Sciences and Sustainability offers a range of internship, project and international experiences that develop students' competencies to undertake social scientific research and translate findings into action.

## Applied Learning

A distinctive feature of the BSc in Social Science and Sustainability is a strong focus on the applied nature of the social sciences, which equips students with practical skills in designing, conducting, and disseminating research. The skill set acquired by students enables them to be proactive leaders across multiple societal, cultural, economic and policy domains where interdisciplinary research ability is in demand. A semester-long work placement in Year Three provides real world experience and interactions with programme partners that enhance the employability of graduates.

<b>Course Name:</b>	BSc (Social Sciences)

# Further Opportunities and Career Prospects

## Career Prospects

The BSc (Social Sciences and Sustainability) prepares students for careers in government bodies from local to EU and international levels; Irish and global NGOs; community and international development; security and crime prevention; urban planning and sustainability; business and industry; human resources, marketing and public relations; journalism and media; education and social research.

## Why Study Social Sciences and Sustainability?

It allows for the synthesis of ideas from diverse disciplines and perspectives because the challenges facing all of us - whether food or energy security, clean transport or public health for example - cannot be solved by a single field of science or technology.

## Further Studies

Graduates will be eligible to apply to a range of MA programmes including the MA in Public Policy, MA in Politics and Sociology, MA in Gender Globalisation and Rights and MA in Community Youth and Family.
